

Marine  
Controls for heaters and air conditioning systems

## Perfectly equipped for maximum comfort: Webasto controls for heaters and air conditioning systems

### **Thermo Call – mobile and flexible**

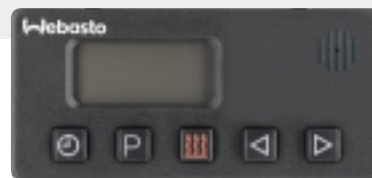

Control your Webasto boat heater via the phone: from your mobile\* or your landline, you can programme the temperature and timer of your boat heater any time you want from wherever you are. Your boat will then greet you with the warmth and cosiness you look forward to when you open the door.

\* Call charges vary depending on mobile phone network and contract terms of user's network provider.

### **Telestart T80 – small and handy**

The Telestart T80 lets you activate your Webasto boat heater at the push of a button and from up to 1000 m away. The smallest remote control on the market, with its two-button system, is sheer child's play to use.

### **Handy digital timer – reliable and practical**

The handy digital timer enables you to program your Webasto water heater for up to three different start times a day and, thanks to its integral alarm-clock function, it can also wake you up.

### **Combi timer – easy to use and customizable**

The integral temperature selection function of the combi timer allows you to preheat your air heating system to the temperature you want. The three different start times a day offer you added flexibility and your own personalized comfort zone.

**Standard Air Top controller – infinitely variable and 100% clear**

The standard rotary controller is easy to use and provides you with infinitely variable control. Suitable for all the Air Top heaters range.

**Webasto Blue Cool control units – discreet and versatile**

Webasto's Blue Cool control units let you choose between two operating modes: fully automatic mode in which the interior temperature is monitored and the Webasto air conditioning system cools your cabin automatically as soon as the temperature programmed is overshoot; or semi-automatic mode in which you can control the fan output so that you can, for instance, reduce the air flow at night so you can sleep peacefully.

**Thermo Top digital timer – simple and easy to use**

The Thermo Top digital timer lets you switch your Webasto heating system on and off and program up to three start times a day.
